

BAN THE BANI

Finally, The Lies

EXPOSED.

(From the W.H.O. to the Surgeon General AND the ACS)

LAWMAKERS! YOU SHOULD BE OUTRAGED!!!

You were fed misinformation and outright lies as per the so called "Killer Dangers" of Secondhand Smoke! You believed it, considering the "well esteemed" sources, thereby allowing yourselves to make a politically dangerous decision in voting for this Draconian Smoking Ban...a law now proclaimed by ANTI-SMOKING ACTIVISTS to be based on Bogus Science. See Below!

Lancet (Medical Journal) Dr. Richard Horton—Editor
cbc.ca/health/story/2007/05/07/who-evidence

When developing "evidence-based" guidelines, the World Health Organization routinely forgets one key ingredient: EVIDENCE. That's the verdict from a study published in the Lancet online Tuesday. The medical journal's criticism of WHO will shock many in the global health community, as one of WHO's main jobs is to produce guidelines on everything from fighting the spread of bird flu to ENACTING ANTI-TOBACCO LEGISLATION. This is a pretty Seismic Event. It undermines the very purpose of WHO. In response, WHO's director of research policy Dr. Tikki Pang states, "We know our credibility is at stake, and we are now going to get our act together".

New Scientist (newscientist.com/channel/opinion/mg19626293.300-editorial-don't-mangle)
"Don't Mangle The Facts, Even In A Good Cause"

It looks as if anti-smoking campaigners have been distorting the facts to make their case. Some have claimed that a non-smoker exposed to tobacco smoke for just a half an hour can permanently increase their risk of heart attack. Yet, a new study suggest that such statements are not supported by science.

Wall Street Journal Michael Siegel (Boston University School of Public Health) **Anti-Smoker.**
[TobaccoAnalysis.blogspot.com/2007/11/anti-smoking-groups-admit-to-knowingly.ht

"Anti-Tobacco Groups Admit to Knowingly Misleading the Public About

"One has a moral responsibility to DISOBEY unjust laws".

Martin Luther King Jr.

"If a law is Unjust, a man has not only the right to DISOBEY it, he is OBLIGED to do so".

Thomas Jefferson

Statewide DEFIANCE count closing in at 80, not to mention the thousands upon thousands of bars in defiance all over the mainland, UK, and Europe. Unjust laws do NOT work, plain and simple, especially laws based on PhonyBalogy science.

Let's Fix This

These highly prestigious medical publications, governmental agencies, and respected voices across the globe are now finally speaking out against Anti-Tobacco organizations for their outright blatant deception, bogus research, and skewed numbers.

British Medical Journal James E. Enstrom "Epidemiologic Perspective & Innovations" (junkScience.com/dec07/Enstrom_Secondhand_tobacco_smoke_2007.pdf.pdf)
My research suggests, contrary to popular claims, that there is not a causal relationship between ETS and mortality in the U.S. responsible for 50,000 excess annual deaths, but rather there is a weak and inconsistent relationship. THE POPULAR CLAIMS TEND TO DAMAGE THE CREDIBILITY OF EPIDEMIOLOGY.

New York Department of Health Commissioner Dr. Farzard Mostashari—**Anti-Smoking Radical**

The 40% decline in Acute Myocardial Infarctions (AMIs—Hearth Attack) associated with a Smoke Free Ordinance in Helena Montana is neither BIOLOGICALLY NOR EPIDEMIOLOGICALLY PLAUSIBLE". (as per the famous study of which anti-tobacco activists have used to convince lawmakers of the need for smoking bans)

FOX News By Radley Balko 7/16/07 **On the Surgeon General's Warning**

Surgeon General Richard Carmona implored "breathing SHS for even a short time can damage cells and set the cancer process in motion...brief exposure can have immediate harmful effects on blood and blood-vessels, potentially increasing the risk of heart disease."
